Client AI Transformation | Enterprise AI Upskilling | Applied AI SME

Enterprise AI enablement manager with 10+ years making technology work for people, including 3 years across 10 enterprise GenAI projects spanning sectors, maturity stages, and platforms. Helps leaders move beyond job-exposure analysis to understand how work actually runs: decomposing roles into tasks, redesigning workflows around AI and human judgment, and building the workforce capability, rollout systems, and value measures needed to scale durable business impact. Strong in executive facilitation, workflow redesign, rollout readiness, data-centric value measurement, AI-first delivery, and scaled upskilling.

Selected Experience

Accenture - Management Consultant, Talent & Organization | 2020-Present

Enterprise AI Enablement: Led enterprise GenAI enablement from executive discovery through workflow redesign, training, rollout, and value measurement, helping convert AI interest into durable operating change.

- Moved leaders from being AI curious to pilot and workflow redesign, rollout readiness, skill development, and value measurement across sectors and global teams at the enterprise level.
- Enabled 50k+ people with the Accenture OpenAI Business Group, led customer-facing OpenAI training and enablement, and showed how deeper AI use translates to delivery value, along with time and cost savings.
- Established C-suite visible data-driven enablement targets, built value analysis with Codex integrating complex and enterprise size data sources, and delivered a web-based success dashboard.
- Led 40+ person scale senior-leader genAI value workshops, in one example identifying 25 workflow redesigns; prioritized 8 and moved them into specific training for a 20k+ employee rollout.
- Partnered with business SMEs to capture success stories and adoption signals; one AI-enabled sales workflow at a major banking client unlocked a \$17M customer opportunity, another backfilled an entire resource in a natural experiment.
- Facilitated 7 reinvention with agentic AI sessions in-office and spoke at 6 town halls reaching 2k+, guiding leaders and practitioners to understand agentic AI concepts and delivery patterns.
- Delivered live remote training sessions for 10k+ employees across projects, built skill libraries from workforce-relevant use cases, and collaborated with client leadership on deployment strategies.
- Led change for an internal AI architecture & patterns team, translating agentic architecture into demos, communications, a web-based knowledge hub, and learning assets for AI engineers, deepening AI fluency.
- Advised OpenAI on certification redesign, capturing 250+ ChatGPT UAT inputs, contributing to learning design rework in OpenAI's certification program from onboarding to learning outcomes.

Emerging Technology Enablement & Learning Transformation: Led global learning and emerging technology programs that combined team leadership, instructional design, change networks, and executive enablement to scale new workforce capabilities with measurable impact.

- Managed a global team of 20 to co-create 140+ learning products, reducing time-to-train by 50% and supporting projected 200% first-year ROI in a highly regulated frontline workforce.
- Built a 2k+ member change network for a VR pilot and enabled 150+ immersive learning sessions and client events, demonstrating a low-cost model for scaling emerging technology adoption.
- Enabled GenAI leadership sessions with CHROs from 12 companies and built executive AI thought leadership for CIO and HR audiences on workforce impact, adoption readiness, and deployment principles.

U.S. Air Force - Airpower Capabilities Liaison (JTAC) & Training Manager | 2010-2015

- Advised 10+ military organizations on airpower in operational environments; designed curriculum across 146 learning objectives and led 12 trainers to certify new personnel mission-ready in 8 weeks.

EDUCATION | 2015 -2019

Columbia University - B.A., Political Science
